SAFE AI KIT · HOW DO I

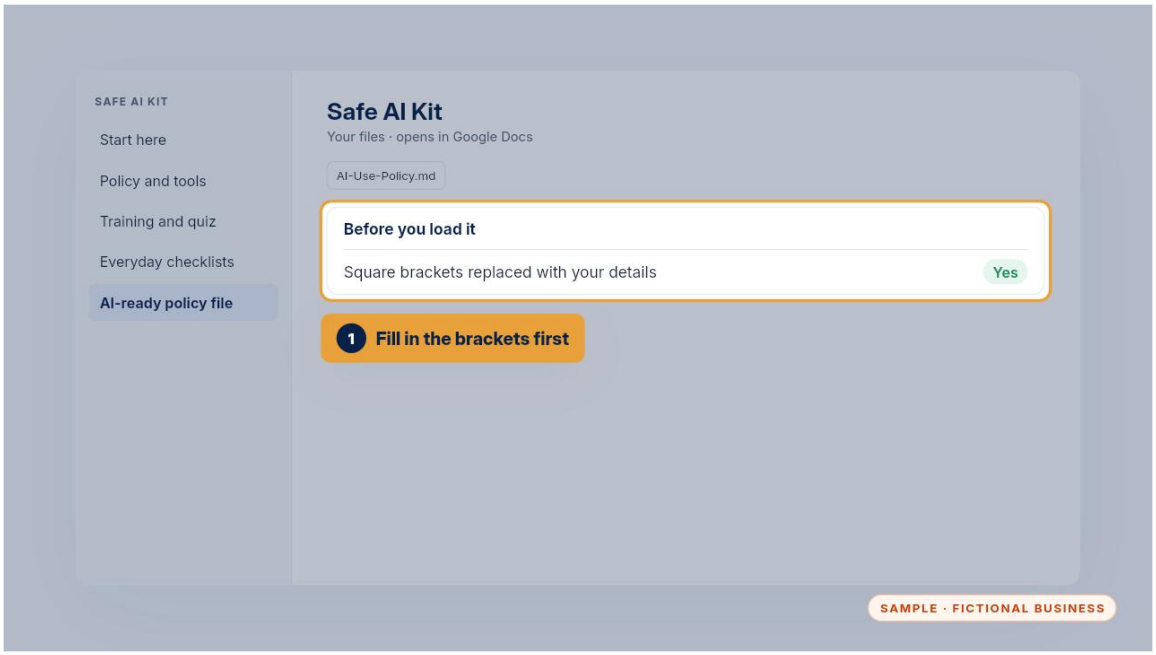

How do I let our AI assistant answer policy questions?

Load the AI-ready policy file so staff can ask it what they're allowed to do.

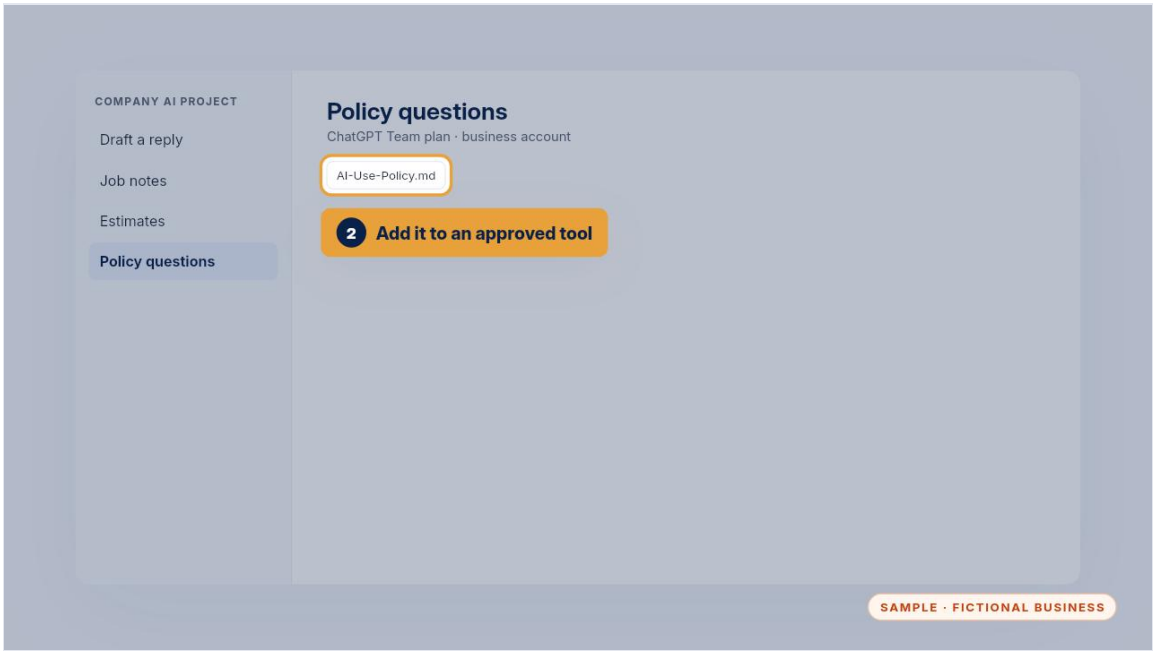

Watch the narrated video: https://openarmsolutions.com/guides/safe-ai-kit/load-the-policy-into-your-ai-assistant

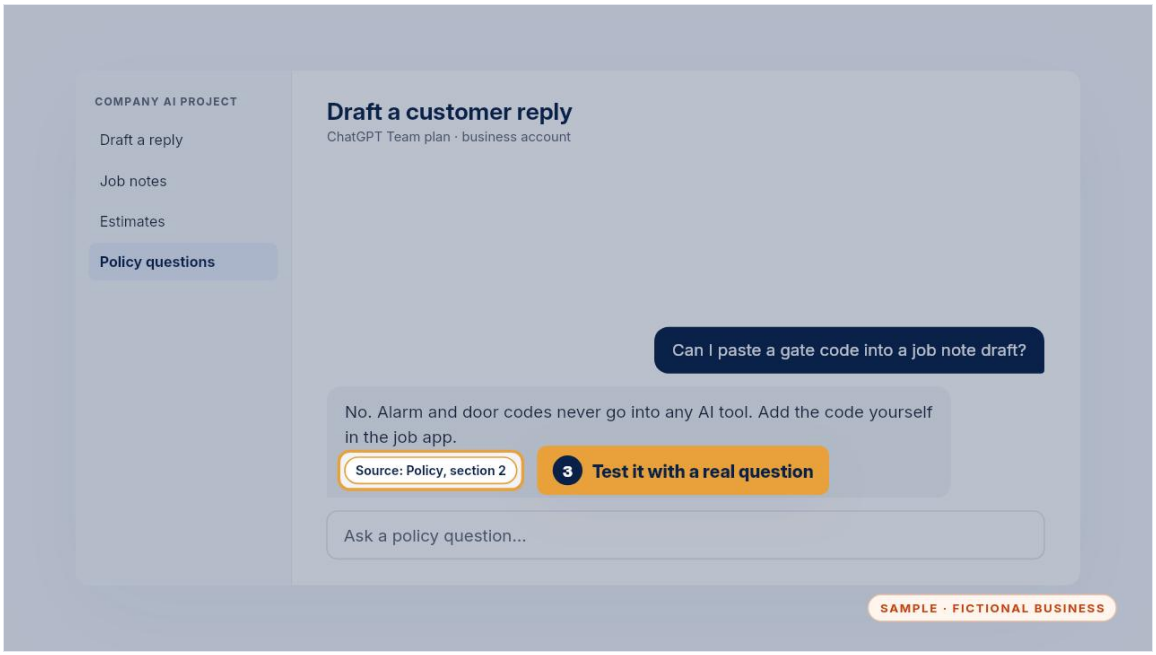

1. Your kit includes the policy and tools list as an AI ready file, so your team's assistant can answer am I allowed to questions.

2 Open the file and replace everything in square brackets with your own details, so it matches the policy your team signed.

3 Add it to an approved tool, like your company AI project, and paste the instructions for that tool from your kit.

4 Ask it a real question to test it. The answer should name the section of your policy it came from. Update the file whenever the policy changes.
