SAFE AI KIT · HOW DO I

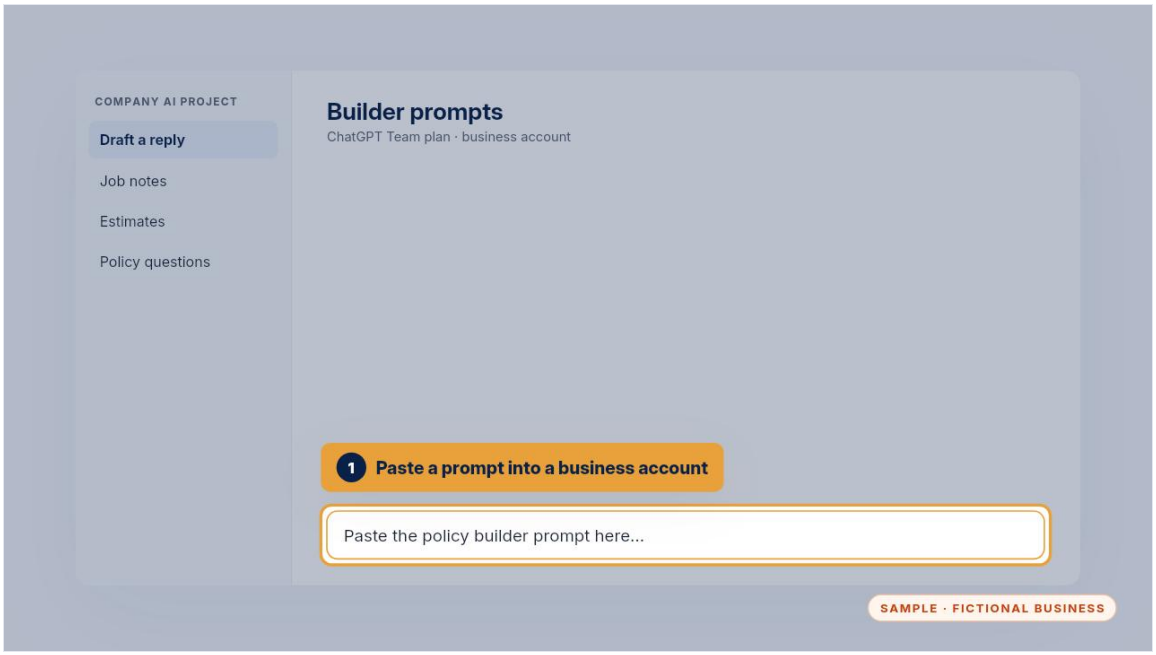

How do I use the builder prompts?

Let your AI tool interview you and draft your policy.

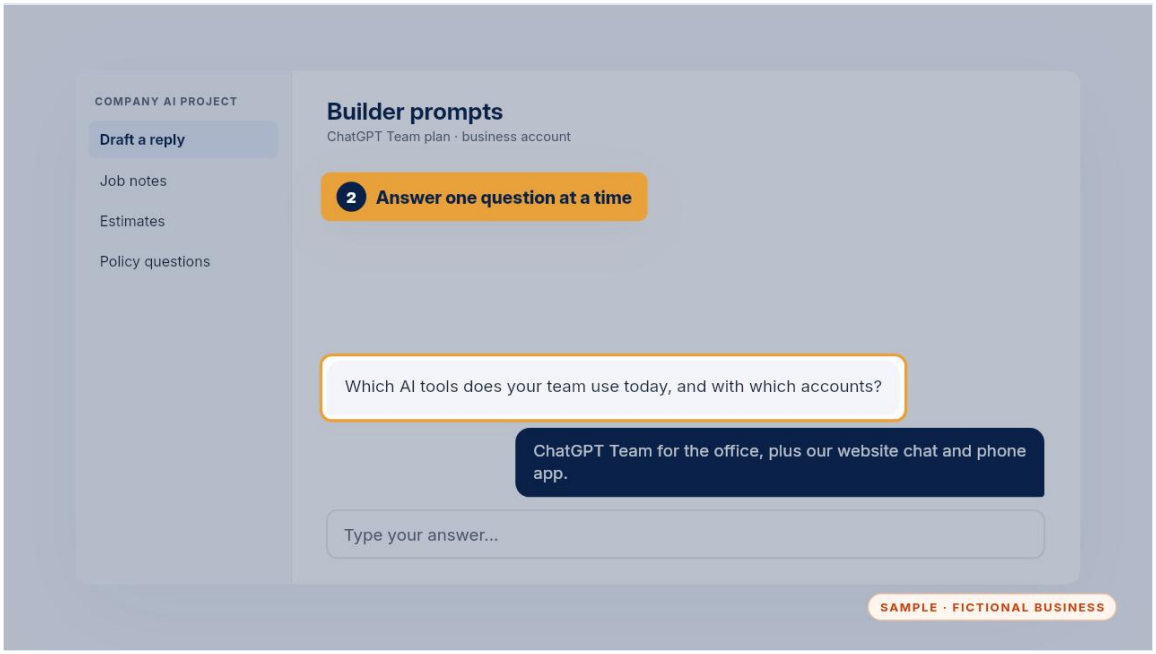

Watch the narrated video: https://openarmsolutions.com/guides/safe-ai-kit/use-the-builder-prompts

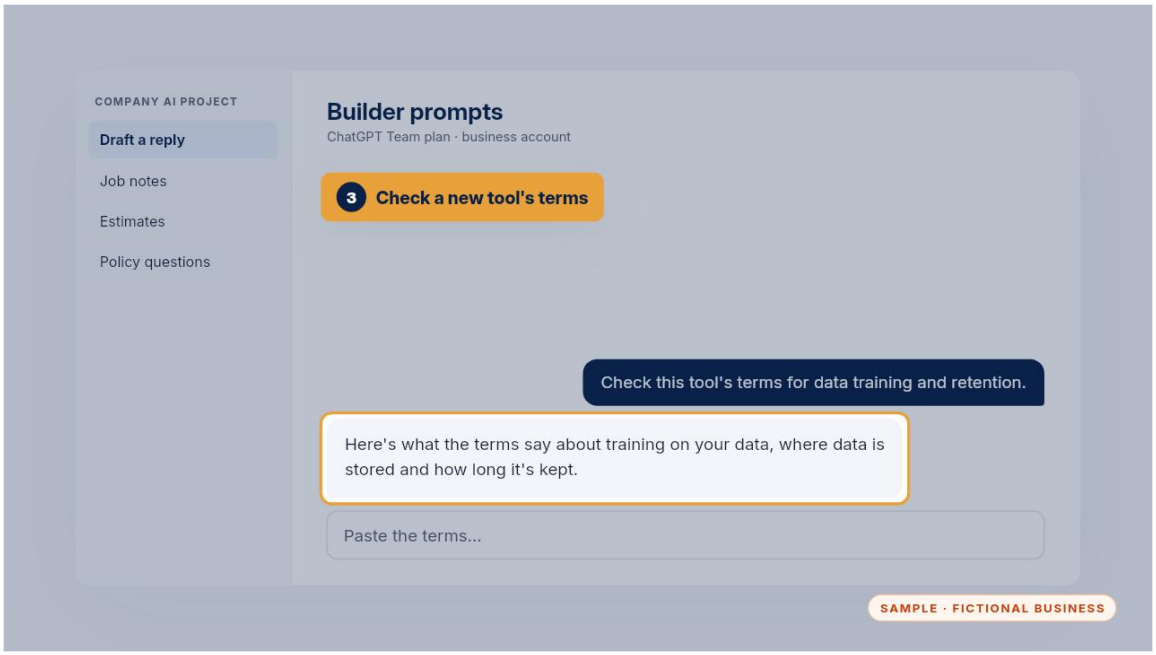

1. Your kit has builder prompts that interview you in your own AI tool.

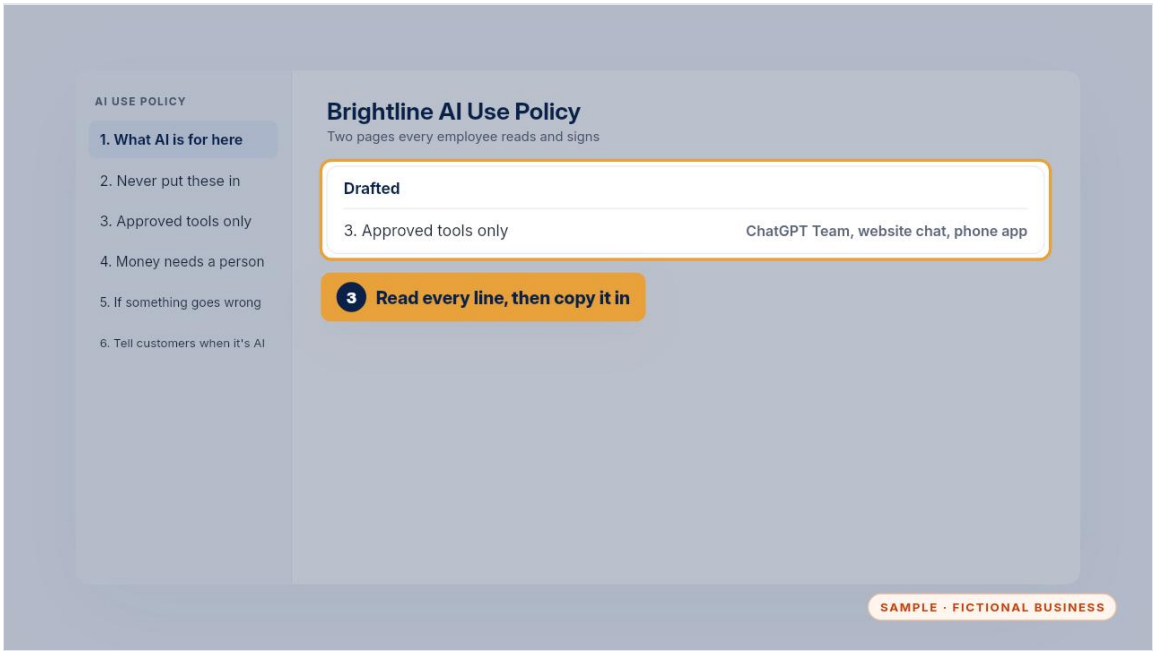

2 Open a new chat in your business account and paste the prompt you need. One writes your policy, one checks a new tool's terms, and one writes training scenarios.

3 It asks one question at a time. Answer about your tools and your work, without pasting any customer details.

4 The tool check prompt reads a new tool's terms and pulls out what matters for the checklist, like training on your data and how long it's kept.

5 Read what it writes, correct anything it guessed, and copy it into your policy template.
